- 5) New business—consideration of proposals from NURS
 - a. Brief overview.
 - i. Additions: paramedic→ ASN
 - ii. Modifications. Of particular note: according to Dr. James, these course modifications do NOT represent large changes in current course content. Why this matters: it has been a concern as of late that a few course modifications have shown so much change to course content as to constitute a new course and thus require a proposal for a new course rather than a course modification. Courses that reflect current practice will (must) change over time as current practice changes, but the overall description of the course as reflecting current practice does not change.
 - iii. **Note: a deletion that is in our queue cannot be put through until the replacement course has been approved, as per Dr. Corbat’s directions
